The new e-Golf
Power consumption in kWh/100 km: 12.7 (combined), CO₂ emissions in g/km: 0 (refers to the CO₂ emitted when driving the vehicle, total CO₂ emissions depend on the origin of the electric power used to charge the vehicle; Volkswagen, therefore, recommends the use of green electricity). Efficiency class: A+.

We make the future real.
An electrifying experience that just keeps going.

Sustainable power: with the new e-Golf, you get to drive a car that meets the challenges of our age and that is driving towards the future with regenerative energy and no emissions. And it combines all this with a good helping of driving fun. Thanks to its 300km range (NEDC)¹ you are equipped for any adventure the urban jungle may have in store.

¹) The specified range is the range completed after completing the cycles of the New European Driving Cycle (NEDC) performed under controlled conditions.

The actual range may vary in practice. When using a standard driving style, it achieves an annual average of around 200 km and depends on the driving style, speed, choice of tyres, use of convenience/auxiliary consumers, exterior temperature, number of passengers/load level, selection of driving profile (normal, ECO, ECO+) and topography.

Energy consumption in kWh/100 km: 12.7, CO₂ emissions in g/km: 0 (refers to the CO₂ emitted when driving the vehicle on the public road; the power used to charge the vehicle; Volkswagen, therefore, recommends the use of green electricity), efficiency class: A+. 

For information on standard CO₂ emissions of vehicles and the method of measurement, please refer to www.dat.de.
The flexible way to charge your battery.

Whether you’re using a household socket, wallbox or public charging station: you get to decide where and how you supply your e-Golf with energy.

The new e-Golf - Charging Options

A wallbox provides up to 300 % more charging capacity (and as a result a shorter charging time) compared to charging using a household socket. The full package consisting of the wall box and installation service is available from our business partner. Contact your Volkswagen Dealer for more information about this offer.

Thanks to the Combined Charging System (CCS) the e-Golf only requires one socket for charging with two different types of plug: alternating current via the charging cable for mains sockets, charging stations and the wallbox or direct current for quick charging at public CCS charging stations.

Thanks to the Combined Charging System (CCS) the e-Golf only requires one socket for charging with two different types of plug: alternating current via the charging cable for mains sockets, charging stations and the wallbox or direct current for quick charging at public CCS charging stations.

Move with the times.

Driving a new e-Golf is a clear statement about CO₂ reduction – and means plenty of fun. That's because the new e-Golf powers up with maximum torque from its very first revolution and accelerates without any interruption thanks to its 1-speed gearbox.

The new e-Golf will take you even further. Thanks to the recuperation function, you can operate the brake.

In contrast, the ECO mode is the perfect solution for drivers who particularly value increased range but, in contrast, reduces the air conditioning system at reduced power. In this case the top speed is 115 km/h, while drivers who particularly value increased range but, in contrast, do not wish to go without agility and comfort. In this case the top speed is 135 km/h, while drivers who particularly value increased range but, in contrast, do not wish to go without agility and comfort. In this case the top speed is 135 km/h, while drivers who particularly value increased range but, in contrast, do not wish to go without agility and comfort.

Recuperation is the recovery of brake energy. In the new e-Golf, this occurs by switching the drive motor into generator operation. The resulting current is fed to the battery, thus recovering brake energy. In ECO mode, the maximum brake energy recovery is 290 Nm (peak) and 211 Nm (continuous). As well as providing constant torque no matter what the motor speed, the new e-Golf's acceleration is also extremely impressive taking the car from 0 to 100 km/h in just 9.6 seconds, and it's particularly fast for the first 800 m. You won't have to worry about losing this power either. The new e-Golf also offers a range of drive modes to suit different driving styles and weather conditions. ECO mode minimises the power consumed, while ECO+ mode maximises it. ECO and ECO+ driving profiles: simply at the touch of a button.

The new e-Golf - Motor & range

The mechanical power is also guaranteed thanks to the eight-year warranty. What's more, the battery is designed in such a way that it fits perfectly in the vehicle, without taking up unnecessary space, and is also optimally protected in the case of a crash.
It’s easy to see when someone is driving an extra special Golf. The e-design with its special LED light signature, blue design elements and aerodynamic features gives the Golf family’s electric vehicle its own unique touch.

Futuristic and yet familiar: as well as the hallmark blue elements, the distinct Volkswagen e-design offers a multitude of attractive highlights, which are more than just visual upgrades to the new e-Golf. Its bright appearance is highlighted thanks to the full LED headlights in a daylight-look colour and the striking design of the LED daytime running lights with their characteristic C shape – both delivering increased safety with lower energy consumption.

Even when viewed from the rear, the new e-Golf also makes a long-lasting impression: with its LED tail light clusters and LED number plate lighting. The tail light clusters are also available with innovative dynamic turn signals as an option.
Whether you want to check the rev counter, speedometer, mileage recorder or your route: thanks to the high-resolution Active Info Display which measures 31.2 cm (12.3 inch) across the diagonal, you can display a range of handy information in whatever arrangement you like, putting the focus on your favourite functions. For example, selecting navigation mode will move the speedometer and rev counter to the edge of the screen, making more space for the map display. You can also transfer data such as telephone contacts, pictures or CD covers from the Infotainment system in the centre console to the Active Info Display.

The interior in the new e-Golf impresses with special features unique to electrical vehicles and an unforgettable design: with blue stitching on the steering wheel and gear lever. The premium leather on the steering wheel and gear lever knob ensures excellent grip and adds a chic touch.
Comfort

Nice and comfy: the new e-Golf is also available with optional “Vienna” leather equipment. The leather is perforated with a coloured background while some areas feature colourful stitching. Elegant décor and ambient lighting add the perfect finishing touch to the exclusive equipment.

Optional extra

- Power consumption in kWh/100 km: 12.7 (combined), CO₂ emissions in g/km: 0 (refers to the CO₂ emitted when driving the vehicle while it is in electric mode; Volkswagen, therefore, recommends the use of green electricity), efficiency class: A+.

The new e-Golf isn’t just good for the outside climate, the “Air Care Climatronic” climate control system with an allergen filter is also good for the climate inside the vehicle. Thanks to the standard auxiliary heater¹⁾, the vehicle interior can be heated, cooled or ventilated while the vehicle is stationary and when the battery is charged so that it is ready for a chosen departure time²⁾. And with the standard heated windscreen, the ice you had to scrape is all water under the bridge. You can also control the stationary air conditioning and the windscreen de-icing function with your smartphone, even on the sofa.

¹⁾ Operating the auxiliary heater while the charging cable is not connected will reduce the vehicle range.

²⁾ In very low or very high outside temperatures, the auxiliary heater’s heating and cooling output may not be powerful enough to reach the set temperature.
From network to network.

Feeling at home while you’re out on the road – this is now possible thanks to the wide range of online services. These services come together in our Car-Net package and help to make your everyday life even easier, even more convenient and even more interesting. Thanks to the optional smartphone interface, you can access both these services with App-Connect and a select number of apps from your mobile phone. All of these apps and services can then be operated using the handy option on the touchscreen for the Infotainment system. Find out more at www.volkswagen.com/car-net.

1. With Car-Net “Security & Service”¹⁾ you can open the side-safe. This new package of Car-Net services provides you with mobile access to key vehicle functions and information for a fee. Whether it’s on your way to the workshop, making an emergency call, calling the breakdown service or using the online anti-theft alarm: your personal assistants will support you in almost any situation and provide you with everything you need to know about mobility.

2. Enhance your cockpit: with Car-Net App-Connect²⁾, you can operate your smartphone’s most important functions for making calls, accessing news and entertainment in your car, even when you’re behind the wheel. App-Connect is simple, safe and convenient and can be operated using the display in the centre console. Take the “Volkswagen My Guide” app, for example, which allows you to explore interesting destinations in your area, taking the weather, traffic and your location into account. App-Connect works with these innovation systems which enable you to access content from your smartphone on your Infotainment system touchscreen: as well as MirrorLink, it is also compatible with Apple CarPlay™ and Android Auto™ by Google. A whole world of mobile apps awaits. ²⁾

3. The new e-Golf – Car-Net

(Not shown): Whether you’re in the inner-city jungle or in far flung places – with Car-Net “Guide & Inform”³⁾ you can find exciting destinations in your area, nearby parking spaces or even the nearest petrol station. In addition, you can access up-to-the-minute traffic information with optional routes for avoiding jams, as well as the latest news from the Internet.

¹⁾ Use of Car-Net “Security & Service” is governed in a separate agreement concluded online with Volkswagen AG. To be able to use Car-Net services, your vehicle must be equipped with aComposition Media radio system, Discover Media or Discover Pro radio system. For more information on Car-Net “Security & Service”, visit www.volkswagen.com/car-net or contact your Volkswagen Dealer; contact your mobile phone company for information on your mobile rates.

²⁾ Use of Car-Net App-Connect is governed in a separate agreement concluded online with Volkswagen AG. To be able to use Car-Net services, your vehicle must be equipped with aComposition Media radio system, Discover Media or Discover Pro radio system. “Car-Net App-Connect” is compatible with MirrorLink®, Apple CarPlay™ and Android Auto™. The availability of this technology closely with smartphone manufacturers to make sure that a wider range of telephones can support Car-Net App-Connect technologies. You can find up-to-date information regarding the compatibility of current and new mobile phones at www.volkswagen.com/mobiltelefon. The services are available during the agreed contractual period and may be subject to amendments during the duration of the contract. To be able to use the Car-Net app free of charge, you need a smartphone with iOS or Android operating system and a SIM card with data option with an existing mobile phone contract between you and your mobile phone company or with a contract concluded separately for this purpose. Depending on your mobile phone tariff, receiving data from the Internet may incur additional charges, particularly if you are using the phone abroad (e.g. roaming charges). For more information on Car-Net “Security & Service”, visit www.volkswagen.com/car-net or contact your Volkswagen Dealer; contact your mobile phone company for information on your mobile rates.

³⁾ Use of the mobile online services from Car-Net “Guide & Inform” is only possible with the optional extras “Discover Media” and “Discover Pro”. The availability of mobile online services depends on the network availability of the mobile operator and the currently used smartphone. To be able to use mobile online services, your vehicle must be equipped with aComposition Media radio system, Discover Media or Discover Pro radio system, a mobile phone with Remote SIM Access Profile (rSAP) or a SIM card with call and data options. Car-Net “Guide & Inform” services are only available in conjunction with an existing mobile phone contract between you and your mobile phone company or with a contract concluded separately for this purpose and only where coverage is available. Depending on your mobile phone tariff, receiving data from the Internet may incur additional charges, particularly if you are using the phone abroad (e.g. roaming charges). Due to the amount of data needed when using Car-Net Guide & Inform services, we strongly recommend signing up to a data flat rate with your mobile phone provider! The services are available during the agreed contractual period and may be subject to amendments. For more information on Car-Net “Guide & Inform”, visit www.volkswagen.com/car-net or contact your Volkswagen Dealer; contact your mobile phone company for information on your mobile rates.
Infotainment

Using the "Comfort" and "Business" mobile phone interfaces you can even connect your mobile phone to your car. If you use Bluetooth® Hands-Free-Profile (HFP) to connect your mobile phone to the hands-free system you can also make calls without needing any cables. The "Comfort" mobile phone interface uses the vehicle’s external aerial to make calls, helping to reduce the level of radiation in the car. An additional aerial amplifier also improves the signal quality. At the same time, you can also charge devices compatible with the Qi standard without a single cable. The "Business" model has a phone module in the vehicle and can alternatively be equipped with a separate SIM card. Using the built-in WiFi hotspot function, you can connect your vehicle to the Internet.

With the gesture control function, you have an even easier and more convenient way to operate the “Discover Pro" radio navigation system. You can operate a whole range of menu options with a single gesture. For instance, you can switch between radio stations by just waving your hand.

The new e-Golf - Infotainment

The energy flow display uses an animated image to show the flow of energy between the electric motor and the battery. It also lets you know the current level of battery charge.

The range monitor display shows the vehicle’s current range along with information on how any other appliances may affect the range.

The recuperation statistics show a minute-by-minute display of how much energy has been recuperated since the start of your journey.

The "Discover Pro" radio navigation system also includes special functions for the new e-Golf: the departure time programming function enables you to set a specific time to start charging so that you can make the most of cheaper energy rates at night. The "360° range" shows how far you can travel in the new e-Golf with the current charge level. The inner area displays the distance you can travel for a round trip while the outer area displays the maximum distance for a one-way trip.

The "Discover Pro" radio navigation system also includes special functions for the new e-Golf: the departure time programming function enables you to set a specific time to start charging so that you can make the most of cheaper energy rates at night. The "360° range" shows how far you can travel in the new e-Golf with the current charge level. The inner area displays the distance you can travel for a round trip while the outer area displays the maximum distance for a one-way trip.

The Power consumption in kWh/100 km: 12.7 (combined), CO₂ emissions in g/km: 0 (refers to the CO₂ emitted when driving the vehicle with grid average power used to charge the vehicle; Volkswagen, therefore, recommends the use of green electricity), efficiency class: A+.
The intelligent driver assistance systems provide added comfort and can help you to tackle or even avoid critical situations.

**Assistance systems**

02 Added comfort, even in a traffic jam. The **Traffic Jam Assist** makes semi-automatic driving in traffic jams, helping to avoid typical accidents during heavy traffic.**¹⁾ The system keeps the vehicle in lane and automatically operates the accelerator and brake in conjunction with DSG dual clutch gearbox. The **Traffic Jam Assist** system is only available as part of the driver assistance package “Plus”.

03 Looks after you — and everybody else: in the event of an imminent collision, the **“Front Assist”** area monitoring system with City Emergency Braking and Pedestrian Monitoring can assist in reducing the severity of the collision or — ideally — in avoiding the collision completely. It detects pedestrians and vehicles on the road and warns the driver in plenty of time.**¹⁾ If the driver fails to respond, the vehicle automatically applies the brake.

04 The **automatic ACC adaptive cruise control** adapts the vehicle’s speed automatically to that of the vehicle driving ahead up to the maximum speed selected²⁾ and maintains the distance set by the driver.**¹⁾ When combined with the DSG dual clutch gearbox, this package includes functions such as the semi-automatic vehicle control “Emergency Assist” and Traffic Jam Assist.

05 This system can save your life in the event of a medical emergency: the **semi-automatic vehicle control “Emergency Assist”** detects when the driver is not fit to drive.**¹⁾ If the system notices that the driver has stopped steering or operating the brake and accelerator, it can keep the vehicle in lane and brake it until it comes to a stop. “Emergency Assist” is only available as part of the driver assistance package “Plus”.

**¹⁾ Within the system’s limits.
²⁾ Up to 210 km/h.

The assistance systems shown are depicted in a standard model.
The new e-Golf – Volkswagen Accessories

With Volkswagen Accessories, you are equipped for anything your everyday adventure may bring. You can discover our complete product range in the “Volkswagen Accessories Complete Catalogue” at your Volkswagen Dealer.¹⁾

01 The roof bars form the basis for all roof systems, like the bicycle holder, surfboard holder or practical roof boxes. ²⁾

02 The bicycle holder features an aerodynamically-shaped plastic profile and a forged holder made out of a highly durable, chrome-plated steel. It can be bolted in and is City crash-tested.³⁾

03 The robust, high-gloss black roof box is made of high-grade plastic and easy to attach to the roof bars thanks to its practical quick-lock design. Due to the extra-large opening angle, it is very easy to load and unload, and is available with a volume of 340 and 460 litres. ²⁾

04 The ski and snowboard holder with its aerodynamic design can be easily installed on the roof bars and is lockable. Thanks to the practical pull-out function, the carrier system can be easily loaded and unloaded. The extra-large opening buttons mean that the ski holder remains easy to use even when wearing thick ski gloves.³⁾

05 The luggage compartment tray with Golf frosting is light, functional and tailor-made for the new e-Golf. The tray protects the luggage compartment from dirt.³⁾

06 The perfectly fitting, non-slip luggage compartment tray reliably protects the luggage compartment against dirt and moisture. When not in use, it easily slides away to ensure space.³⁾

07 The tear-resistant luggage net is ideal for all of those small and medium-sized items you prefer to keep stored safely away. It is attached to the standard lashing eyes in the luggage compartment.³⁾

08 Children between the ages of three and twelve years (15 to 36 kg) travel securely and comfortably in the G2-3 ISOFIT child seat thanks to its height-adjustable sleep support and height and tilt angle which can be individually adjustable according to the child’s needs. It is also available with an optional removable headrest.³⁾

09 The easy-to-clean, anti-slip seat cover prevents dirt or wear, for example from child seats. Practical net pockets also provide additional stowage space. Can also be used with ISOFIX seats.³⁾

10 Protect your car’s gleaming paintwork against harmful environmental influences – with the custom-fitted Car Cover for your new e-Golf. The custom-fit and breath-active indoor and outdoor vehicle cover is made from elastic stretchy fabric. It is extremely light, antistatic, waterproof, weather-resistant, washable and durable. The interior is lined with special fleece to protect the vehicle’s paintwork. ³⁾

11 With Volkswagen Accessories, you are equipped for anything your everyday adventure may bring. You can discover our complete product range in the “Volkswagen Accessories Complete Catalogue” at your Volkswagen Dealer.¹⁾

12 Standard equipment. Optional extra. ³⁾

13 Further details on the complete range are available from your Volkswagen Dealer or at www.volkswagen-accessories.com. ³⁾

14 The smartphone between the ages of three and twelve years (15 to 36 kg) is a logical first step to child safety and comfort. It is designed for the Golf ISOFIX child seat³⁾. Thanks to its height-adjustable head rest and height and tilt angle which can be individually adjustable according to the child’s needs. It is also available with an optional removable headrest.³⁾

15 The way the child’s body seat moves prevents dirt or wear, for example from child seats. Practical net pockets also provide additional stowage space. Can also be used with ISOFIX seats.³⁾

16 Protect your car’s gleaming paintwork against harmful environmental influences – with the custom-fitted Car Cover for your new e-Golf. The custom-fit and breath-active indoor and outdoor vehicle cover is made from elastic stretchy fabric. It is extremely light, antistatic, waterproof, weather-resistant, washable and durable. The interior is lined with special fleece to protect the vehicle’s paintwork. ³⁾

17 With Volkswagen Accessories, you are equipped for anything your everyday adventure may bring. You can discover our complete product range in the “Volkswagen Accessories Complete Catalogue” at your Volkswagen Dealer.¹⁾

18 Standard equipment. Optional extra. ³⁾

19 Further details on the complete range are available from your Volkswagen Dealer or at www.volkswagen-accessories.com. ³⁾

20 The smartphone between the ages of three and twelve years (15 to 36 kg) is a logical first step to child safety and comfort. It is designed for the Golf ISOFIX child seat³⁾. Thanks to its height-adjustable head rest and height and tilt angle which can be individually adjustable according to the child’s needs. It is also available with an optional removable headrest.³⁾

The Volkswagen Accessories Complete Catalogue is available for free at your Volkswagen Dealer. Your local Volkswagen Accessories Specialist will be able to advise you on the options available in your country. ³⁾
The illustrations on these pages can only be regarded as a general guide. The printing process cannot render the seat upholstery and paint finishes with absolute accuracy. The illustrations of the seats are of our basic seat model; the seats in the vehicle may differ should you decide to upgrade.
